INDUSTRIAL TIMING BELTS & SYNCHRONOUS PULLEYS

KUEISN

WUXI TRANSMISSION EQUIPMENT CO., LTD.

Your Reliable Drive, Simplified.

Manufacturer of custom timing belts, synchronous pulleys, V-belts and conveyor belts, integrating R&D, design, and sales for the global industrial equipment market since 2013.

Company Profile

VISIT PAGE ■

WUXI KUEISN TRANSMISSION EQUIPMENT CO., LTD. integrates R&D, design, and sales, focusing on the original supporting equipment and spare parts industry. We continuously develop and innovate to meet customers' specialized transmission needs, supported by application-centered testing technology, while remaining mindful of resource and environmental protection.

From couplings and expansion sleeves to high-strength drive belts, KUEISN delivers tailored system solutions across photovoltaic, new energy, automation, machinery, and nearly every other industrial field.

Four Core Strengths

Stable & Reliable Quality

ISO9001-based quality management with rigorous inspection from raw materials through final testing, ensuring consistency in every belt and pulley.

Large-Scale Supply & Cost-Effectiveness

Advanced production capacity meets bulk global orders with optimized supply chains and highly competitive pricing.

Advanced R&D; & Customization

A dedicated R&D; team tracks industry trends, delivering deep customization tailored to each customer's application.

Customer-Oriented, Flexible Service

An adaptable order management system ensures fast response from sample to mass production, guaranteeing on-time delivery.

WHAT WE MAKE

Product Range

VISIT PAGE ■

1

Rubber Timing Belts

Arc-tooth and trapezoidal-tooth rubber timing belts, open belts requiring no connector, and low-noise double-sided designs for stable, high-precision drive.

View ■

2

Eagle (Herringbone) Timing Belts & Pulleys

Herringbone / helical-tooth belts paired with high load-bearing herringbone pulleys for heavy-duty, self-centering transmission.

View ■

3

Polyurethane Timing Belts

Wear-, oil- and chemical-resistant PU belts offering long service life and excellent dimensional stability for precision automation.

View ■

4

V-Belts

Classical and wedge-profile V-belts engineered for reliable power transmission across general industrial and heavy-load drive systems.

View ■

5

Timing Pulleys

Precision-machined pulleys in various tooth profiles, bore sizes, keyways, and surface treatments, produced to exact drawings.

View ■

6

Conveyor Belts

Durable conveying belts including cushioning-felt options for low-vibration material handling lines.

View ■

7

Car Belts

Automotive timing belts and V-belts, including variable-diameter designs, for aftermarket and OEM automotive applications.

View ■

Industries Served

VISIT PAGE ■

Machine Tool

Micrometer-level transmission precision in CNC spindles, tool changers, and feed systems.

Details ■

Automation

Used in robotics, AGVs, and precision linear actuators for high repeatability.

Details ■

Food Processing

Precision solutions for meat cutting, bakery lines, and cleaning equipment.

Details ■

Medical Device

Contamination-free drive components for imaging systems and surgical robots.

Details ■

Mining & Agri. Machinery

Drive systems for harvesters and seeders, built for environmental adaptability.

Details ■

Textile Industry

High-speed, precision transmission in spinning frames, looms, and printing machines.

Details ■

Beyond these core sectors, KUEISN also supports photovoltaic, new energy, and general industrial machinery customers with couplings, expansion sleeves, and high-strength drive belts.
